Subject: Keeping track of the tasks....

Ok. So I don't drop one of the proverbial balls, I need to make a list to keep myself honest. Also George added another item to our list for Anguilla, so that is included below. Please let me know if there is anything I can do to complete tasks.

AES related items:

Mtg scheduled 6/27 with Susan and Richard. Topics to be discussed include:

When will the validated LEAF data be available (both tests) ?

What other data will be needed to model contaminant concentrations in groundwater near the land placement sites ?

What is the standard format for reporting the LEAF data ? Will the standard report suffice, given that we will be modeling ?

What model will be used ?

What will modeling cost ?

What measure will be used to evaluate risk in the modeling ?

Prior to mtg reach out to Mark M to discuss benchmark values for identification of contaminants of concern based on LEAF results.

Ex. 5 - Deliberative

Ex. 5 - Deliberative Try to meet with Mark before 6/27 mtg. done - epa standards received

Find a copy of PR groundwater standards. Reach out to RCRA programs branch. done - awaiting eqb standards from stephen gould

Anything else? I think that's all we need to do in prep for the meeting agreed
